**Price: \$49.99**

## Short Description

Joomla Authenticate users via Azure Active Directory. Microsoft users authentication using Joomla plugin

## Description

The Joomla Azure Active Directory Authentication Plugin simplifies user management by leveraging the power of Azure Active Directory. This lightweight and efficient tool provides secure access control, allowing authenticated users to interact with your Joomla site effortlessly. With easy integration and full compatibility across Joomla's latest versions, this plugin is an ideal solution for enhanced security and streamlined user authentication.

Features and Functionalities:

**Effortless Integration:** Streamline the authentication process with this plugin's user-friendly setup, making it quick and easy to integrate Azure Active Directory into your Joomla site.

**Azure Active Directory Connectivity:** Securely authenticate users by connecting your Joomla website to Azure Active Directory, providing reliable identity management and access control.

**Compatibility Across Joomla Versions:** Fully compatible with Joomla 4.x and Joomla 5.x, ensuring seamless functionality on modern Joomla platforms.

## HOW TO USE:

- **Set up an Azure AD Application:**
  - Go to the [Azure portal](#).
  - Navigate to **Azure Active Directory > App registrations > New registration**.
  - Name the application (e.g., JoomlaIntegrationApp).
  - Set the **Redirect URI** to your Joomla site's URL (e.g., <https://yourjoomlasite.com/>).
  - Choose **Web** as the platform.
  - Note down the **Application (client) ID** and **Directory (tenant) ID**.
  - Go to **Certificates & Secrets** and create a **client secret**. Note down this value.
- **Install Composer and Azure PHP SDK in Joomla:** Joomla 5 relies on Composer for managing external libraries. The microsoft-graph package is used to interact with Azure AD.
  - In your Joomla root directory, run:

```
bash
```

Copy code

composer require microsoft/microsoft-graph

Plugin: COM\_PLUGINS\_AZURE\_SETTINGS\_FIELDSET\_LABEL

**Azure Authentication**  
auth / azureauth  
Authenticate users via Azure Active Directory
