## Short Description

This module allows you to embed audio files into your Joomla site, making it easy to enhance the user experience with sound. Whether you're hosting podcasts, streaming music, or making announcements, this module offers flexible and customizable features to suit your needs. The responsive design ensures that the audio player looks great and functions well on both desktop and mobile devices.

## Description

### Joomla Audio Player Module

#### Functionality:

**Enhanced Website Experience:** This module integrates audio into your website, making it more engaging and interactive.

**Autoplay and Loop Settings:** Adjust settings for autoplay and loop to suit your needs.

**Flexible Positioning:** Choose from a wide range of position options and float or stick the player in locations like bottom left, bottom right, top left, and top right.

**Template Compatibility:** Works seamlessly with all types of Joomla templates.

**Version Compatibility:** Fully compatible with Joomla versions 4 and 5.

**Simple Setup:** Easy to install and configure, ensuring a hassle-free experience.

This module enhances your Joomla website by allowing you to integrate audio with ease.

Whether you want the audio to start automatically, loop continuously, or be positioned in various spots on your site, this module offers flexible settings to match your preferences. Its compatibility with different templates and Joomla versions makes it a versatile and user-friendly addition to your site.

The screenshot displays the Joomla! administrator interface for the 'audioplayer' module. The top section shows the module title 'audioplayer' and a description: 'audio player with loop, autoplay, and floating positioning functionality.' Below this is an 'Audio File' field containing 'images/voice1.mp3' with a 'Select' button and a red 'X' icon. A red arrow points to this field. To the right of the audio file field are radio buttons for 'Autoplay' (Yes/No) and 'Loop' (Yes/No). The right sidebar contains settings for 'Title' (Show), 'Position' (content-top), 'Status' (Published), 'Start Publishing', 'Finish Publishing', 'Access' (Public), and 'Ordering'. At the bottom, a 'Module saved.' notification is visible. The 'Layout Options' tab is selected and highlighted with a red box, showing 'Floating Player' (Yes/No) and 'Floating Position \*' (Bottom Left).
