Price: \$24.99

Short Description

This module enables you to embed interactive maps from OpenStreetMap into your Joomla website. It's perfect for displaying locations, adding custom markers, and providing additional geographical information, enhancing the overall user experience on your site.

Description

Joomla OpenStreetMap Module

Functionality:

Interactive Mapping: This module integrates OpenStreetMap into your Joomla site, providing an interactive map for your users.

Custom Markers: Add customized markers to highlight specific locations, such as your business, events, or points of interest.

Layer Control: Allows the addition of various layers to the map, enhancing the user experience with additional details.

Responsive Design: Ensures the map is fully functional and looks great on all devices, including desktops, tablets, and smartphones.

Flexible Configuration: Easily configure the map's zoom level, center point, and display options to fit your needs.

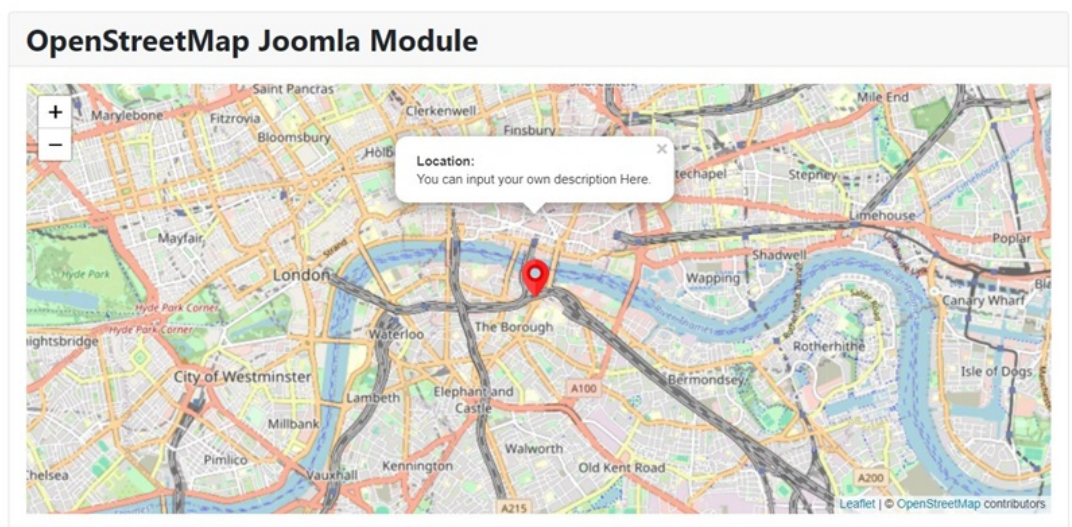

Compatibility: Fully tested and operational on Joomla versions 4 and 5, compatible with

all Joomla templates.

User Engagement: Enhance user interaction by providing them with detailed geographical information directly on your website.

Simple Setup: Quick and easy installation and configuration, allowing you to add maps without any hassle.

This module enables you to embed interactive maps from OpenStreetMap into your Joomla website. It's perfect for displaying locations, adding custom markers, and providing additional geographical information, enhancing the overall user experience on your site.
