Description

Joomla Skype Integration Module

Functionality:

Seamless Communication: This module allows you to integrate Skype directly into your Joomla website, enabling real-time communication with your visitors.

User Interaction: Visitors can initiate Skype calls or chats directly from your site, enhancing user engagement and support.

Customizable Settings: Adjust the module's appearance and settings to match your website's design and functionality needs.

Flexible Positioning: Position the Skype button or widget anywhere on your site based on your layout preferences.

Responsive Design: Ensures that the Skype integration works smoothly on all devices, including desktops, tablets, and smartphones.

Compatibility: Fully tested and operational on Joomla versions 4 and 5, and works with

all Joomla templates.

Easy Setup: Quick and simple installation and configuration, making it easy to add Skype functionality to your site.

This module integrates Skype into your Joomla site, allowing you to provide real-time communication options for your visitors. Whether for customer support, consultations, or general inquiries, this module ensures seamless and efficient interaction directly through your website.
