Joomla Module for Sticky or floating Header Announcements

Description
Joomla Module for Sticky or Floating Header Announcements

Functionality:

Flexible Module Assignment: Place the module in any desired position on your site.

Customizable Background Colors: Choose any color for the background to match your website's design.

Animation Options: Select from two animation types: running text and typing effects. These animations add dynamism to your announcements.

Customizable Buttons: Modify the colors of buttons and hover effects to enhance visual appeal.

Versatile Usage: Use it as a floating module or a regular, static module based on your layout preferences.

Responsive Design: Optimized for mobile devices, ensuring your announcements look great on any screen size.

Compatibility Tested: Works seamlessly with Joomla versions 4 and 5.

Effective Marketing Tool: Perfect for highlighting promotions, announcements, and important information.

Attention-Grabbing Design: Designed to capture visitors' attention with visually appealing elements.

External Links: Easily add external links with customizable button labels.

Icon Customization: Personalize icons to suit your needs.

Cross-Browser Compatibility: Functions smoothly across all web browsers and all template types.

This module is designed to make important announcements on your Joomla site stand out. Whether it's a promotion, a crucial update, or a simple notification, this module ensures that the message stays visible as users scroll through your site. You can fully customize the appearance to match your site's design and set animations to make the message even more engaging. The module's responsive design guarantees a smooth experience on both desktops and mobile devices, making it an effective tool for marketing and communication across all platforms.
