Short Description

This module is perfect for adding a whimsical and dynamic effect to your Joomla site. By customizing the animation speed and delay, you can create a unique and captivating star field that enhances the overall user experience and keeps visitors engaged.

Description

Joomla Module for Floating Stars with Random Colors

Functionality:

Dynamic Visuals: This module adds an animated effect of floating stars with random colors to your Joomla website, enhancing its aesthetic appeal.

Customizable Animation: The Joomla admin panel includes fields for Animation Speed and Animation Delay. These fields allow you to control the speed of the floating animation and the delay between each star's creation, giving you complete flexibility over how the animation looks and behaves.

Random Color Generation: Each star is assigned a random color, creating a vibrant and lively display that captures visitors' attention.

Responsive Design: The animation works seamlessly across all devices, ensuring a consistent visual experience on desktops, tablets, and smartphones.

Versatile Use: Perfect for adding a magical touch to your site, celebrating special events,

or simply making your website more engaging.

Compatibility: Fully tested and operational on Joomla versions 3, 4 and 5, and works with all Joomla templates.

Easy Setup: Quick to install and configure, enabling you to add the floating stars effect to your site with minimal effort.

This module is perfect for adding a whimsical and dynamic effect to your Joomla site. By customizing the animation speed and delay, you can create a unique and captivating star field that enhances the overall user experience and keeps visitors engaged.

The image displays a Joomla! website with a dark blue header labeled 'CASSIOPEIA'. Below the header, a breadcrumb trail reads 'You are here: Home'. The main content area features the text 'Home Star animation effect' in orange, accompanied by several floating stars in various colors (yellow, pink, red, green). On the right side, there are two floating panels: 'Main Menu' with links for 'Home' and 'Menu 2', and a 'Login Form' with fields for 'admin' and a password, a 'Remember Me' checkbox, and a 'Log in' button. Below the website preview, the Joomla! administrator interface is shown for the 'mod_floatingstars' module. The interface includes a title field containing 'mod_floatingstars', tabs for 'Module', 'Menu Assignment', 'Advanced', and 'Permissions', and a description: 'A Joomla 5 module that displays floating stars with random colors.' The configuration options are: 'Animation Speed (seconds)' set to 5, 'Animation Delay (milliseconds)' set to 500, 'Title' with a 'Hide' checkbox, 'Position' set to 'main-top', 'Status' set to 'Published', and 'Start Publishing' with a calendar icon. A red box highlights the 'Animation Speed' and 'Animation Delay' fields.
