Description

Joomla Module for Floating Circles with Random Colors

Note: This is also available in WordPress - [Click Here](#)

Functionality:

Dynamic Visuals: This module enhances the aesthetic appeal of your Joomla website by adding an animated effect of floating Circles with random colors.

Customizable Animation: The Joomla admin panel includes Animation Speed and Animation Delay fields. These fields allow you to control the speed of the floating animation and the delay between each star's creation, giving you complete flexibility over how the animation looks and behaves.

Random Color Generation: Each star is assigned a random color, creating a vibrant and

lively display that captures visitors' attention.

Responsive Design: The animation works seamlessly across all devices, ensuring a consistent visual experience on desktops, tablets, and smartphones.

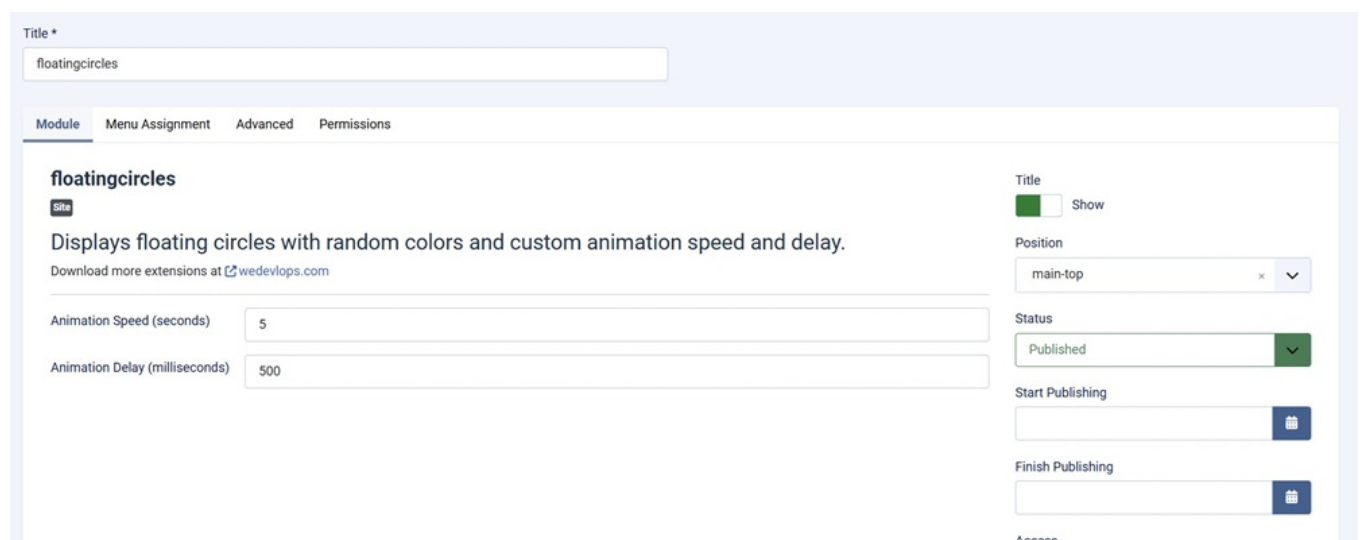

Versatile Use: Perfect for adding a magical touch to your site, celebrating special events, or simply making your website more engaging.

Compatibility: Fully tested and operational on Joomla versions 3, 4, and 5, and works with all Joomla templates.

Easy Setup: Quick to install and configure, enabling you to add the floating Circles effect to your site with minimal effort.

This module perfectly adds a whimsical and dynamic effect to your Joomla site. By customizing the animation speed and delay, you can create a unique and captivating star field that enhances the overall user experience and keeps visitors engaged.

The screenshot displays the Joomla! administrator interface for the 'floatingcircles' module configuration. At the top, there is a 'Title *' field containing 'floatingcircles'. Below this, a tabbed interface shows 'Module', 'Menu Assignment', 'Advanced', and 'Permissions', with 'Module' being the active tab. The main content area for the 'floatingcircles' module includes a description: 'Displays floating circles with random colors and custom animation speed and delay.' and a link to 'Download more extensions at wedevs.com'. Two input fields are present: 'Animation Speed (seconds)' with a value of '5' and 'Animation Delay (milliseconds)' with a value of '500'. On the right side, there are additional settings: 'Title' with a 'Show' checkbox, 'Position' set to 'main-top', 'Status' set to 'Published', 'Start Publishing' and 'Finish Publishing' date pickers, and an 'Access' section at the bottom.
