Joomla Module for Floating Image with Custom URL and Bouncing Effects

Brand: WeDevlops
Product Code: Image float bounce
Availability: In Stock
Weight: 0.00kg
Dimensions: 0.00cm x 0.00cm x 0.00cm

Price: $19.99

Short Description

This module enhances your Joomla website by adding a dynamic floating image with a bouncing effect. The ability to link the image to a custom URL makes it a versatile tool for guiding visitors to important sections of your site, while the bouncing animation ensures it stands out and captures attention.

Description

Joomla Module for Floating Image with Custom URL and Bouncing Effects

Functionality:

Dynamic Visual Appeal: This module allows you to add a floating image to your Joomla website, which bounces to catch visitors' attention.

Custom Image: Upload any image of your choice to use in the module, giving you full control over the visual content.

Custom Description: Add a custom Description below the image. Plain text or HTML is accepted.

Custom URL Integration: Set a custom URL in the module's backend. When users click on the floating image, they will be redirected to this URL. This feature is perfect for linking to important pages, such as promotions, contact forms, or special offers.

Bouncing Animation: The image has a bouncing effect, making it more engaging and visually appealing. The movement helps to draw the user's eye and increases interaction.

Adjustable Settings: Customize the bounce speed and other settings to match your website's design and desired user experience.

Responsive Design: The animation and image work seamlessly across all devices, ensuring a consistent and smooth experience on desktops, tablets, and smartphones.

Compatibility: Fully tested and operational on Joomla versions 4 and 5, and works with all Joomla templates.

Easy Setup: Simple to install and configure, allowing you to quickly add this interactive feature to your site.

This module enhances your Joomla website by adding a dynamic floating image with a bouncing effect. The ability to link the image to a custom URL makes it a versatile tool for guiding visitors to important sections of your site, while the bouncing animation ensures it stands out and captures attention.
