Description

Joomla QR Code Plugin

Functionality:

This Joomla plugin automatically generates and displays a QR code for each page on your website. The QR code links directly to the content of the page, making it easy for visitors to scan and access the page using their mobile devices.

Key Features:

Automatic QR Code Generation: The plugin generates a unique QR code for each page on your website without any manual input required.

Adjustable QR Code Size: Users can change the size of the QR code to fit their website's design and layout. Options for custom sizes.

Positioning Options: The plugin allows users to adjust the position of the QR code on the page. Options include top, bottom, or both (top and bottom).

Position: Select the position of the QR code on the page: top, bottom, or both.

Responsive Design: Ensure the QR code is responsive and displays correctly on all devices and screen sizes.

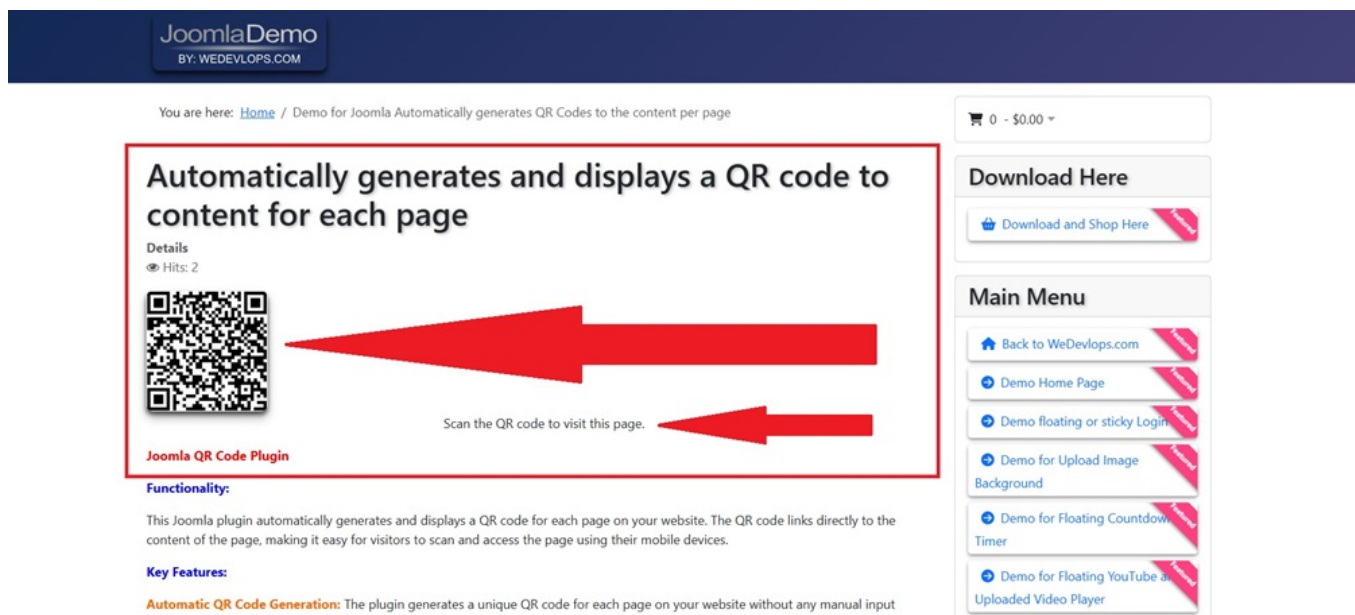

Compatibility: The plugin is compatible with various Joomla versions and works seamlessly with different templates.

Ease of Use: Simple installation process with no additional configuration required. Just install the plugin, and it will automatically generate QR codes for all pages.

Performance: Optimized for performance to ensure fast loading times and minimal impact on website speed.

This plugin is designed to enhance user engagement by providing a quick and easy way for visitors to access your content. It's perfect for websites that want to leverage QR codes for marketing, sharing information, or improving user experience.

[DEMO CLICK HERE](#)

The screenshot shows a Joomla website demo for the 'Joomla QR Code Plugin'. The page features a dark blue header with the 'JoomlaDemo' logo and 'BY: WEDEVLOPS.COM'. Below the header, a breadcrumb trail reads 'You are here: [Home](#) / Demo for Joomla Automatically generates QR Codes to the content per page'. The main content area is titled 'Automatically generates and displays a QR code to content for each page' and includes a QR code, a red arrow pointing to it, and the text 'Scan the QR code to visit this page.' Below the QR code, the text 'Joomla QR Code Plugin' is displayed. The 'Functionality:' section states: 'This Joomla plugin automatically generates and displays a QR code for each page on your website. The QR code links directly to the content of the page, making it easy for visitors to scan and access the page using their mobile devices.' The 'Key Features:' section includes 'Automatic QR Code Generation: The plugin generates a unique QR code for each page on your website without any manual input'. On the right side of the page, there is a shopping cart icon showing '0 - \$0.00', a 'Download Here' button, a 'Download and Shop Here' button, and a 'Main Menu' section with several menu items: 'Back to WeDevs.com', 'Demo Home Page', 'Demo floating or sticky Login', 'Demo for Upload Image Background', 'Demo for Floating Countdown Timer', and 'Demo for Floating YouTube Uploaded Video Player'.
