The floating image is clickable and can redirect users to a new URL specified by the admin. The link opens in a new window, making it perfect for guiding visitors to promotional pages, sign-ups, or special offers.

Description

WordPress Plugin for Floating Image with Custom URL

Functionality:

Dynamic Visual Element: This plugin adds a floating image to your WordPress site, designed to attract visitors' attention through its movement and strategic placement on the page.

Engaging Design: The floating image is a standout feature that helps highlight important information or calls to action. You can easily adjust the image size to optimize its visibility according to your needs.

Customizable Image: Instead of uploading an image, you can use an image URL to save space on your hosting. This provides you with full control over the visual content displayed.

Responsive and Mobile-Friendly: The floating image seamlessly works across all devices, ensuring a consistent and smooth user experience on desktops, tablets, and smartphones.

Easy Integration: The plugin is simple to install and configure, allowing you to quickly

add the floating image URL with minimal effort.

Versatile Use Cases: This feature is ideal for promotions, announcements, sign-ups, or directing traffic to specific pages on your site.

PRO Version Features:

Customizable URL: The floating image is clickable and can redirect users to a new URL specified by the admin. The link opens in a new window, making it perfect for guiding visitors to promotional pages, sign-ups, or special offers.

Engaging Animation: The image includes a bouncing effect, adding a dynamic visual element that is eye-catching and perfect for promoting announcements or special events.

This plugin enhances your WordPress site by integrating a floating image with a custom URL. It's a versatile tool that captures attention and guides users to key areas of your website, thereby increasing engagement and conversions.
