Description

Google Tag Manager WordPress Plugin

Functionality:

Effortless Setup: No coding required. Simply copy and paste your Google Tag Manager code into the plugin.

User-Friendly Integration: Designed to be straightforward, making it easy for anyone to add Google Tag Manager to their WordPress site.

Efficient Tag Management: Enables you to manage all your website tags (e.g., tracking and marketing tags) from a single interface, without needing to edit your site's code.
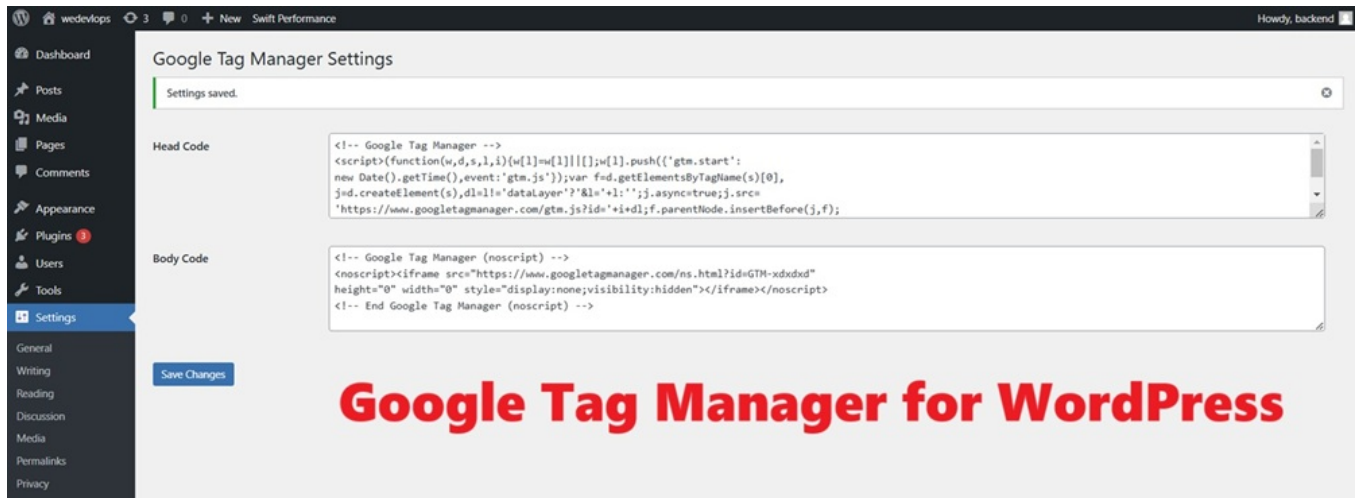

Streamlined Updates: Allows you to update and add new tags quickly and efficiently without having to modify your WordPress templates.

Enhanced Analytics: Provides comprehensive tracking and insights into user behavior, helping you optimize your site for better performance.

Compatibility: Works seamlessly with all WordPress templates and versions.

This plugin simplifies the process of integrating Google Tag Manager into your

WordPress site, allowing you to efficiently manage and deploy tags. Just copy and paste your Tag Manager code, and you're all set to start tracking and optimizing your website's performance.
