Description

The **Google Calendar URL Embed Joomla extension** module is designed to seamlessly integrate Google Calendar into Joomla websites, providing a responsive and user-friendly solution for displaying events. This module is ideal for users who want a simple setup without requiring coding knowledge.

[Key Features & Functions](#)

Easy Google Calendar Integration

- Allows embedding of Google Calendar using a simple URL.
- No complex configuration—just copy and paste the calendar link.

Fully Responsive Design

- Works across all devices, including desktops, tablets, and mobile phones.
- Adapts to different screen sizes for optimal viewing.

Compatibility with All Joomla Templates

- Supports Bootstrap-based templates, ensuring smooth integration.

- Works with Joomla 3.x, 4.x, and newer versions.

Multiple Calendar Views

- Displays events in month, week, and day views.
- Users can switch between views for better event visualization.

Customizable Appearance

- Allows users to modify colors and styles to match their website branding.
- Supports tooltip display for event details.

Event Details & Google Maps Integration

- Shows event descriptions, locations, and times directly within Joomla.
- Integrates Google Maps for location-based events.

Multi-Language Support

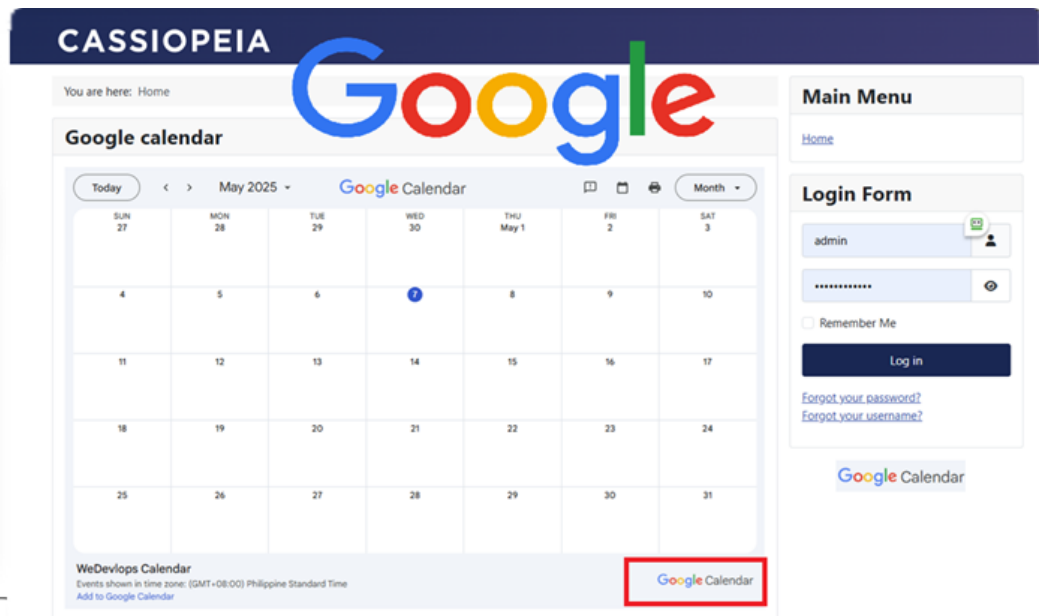

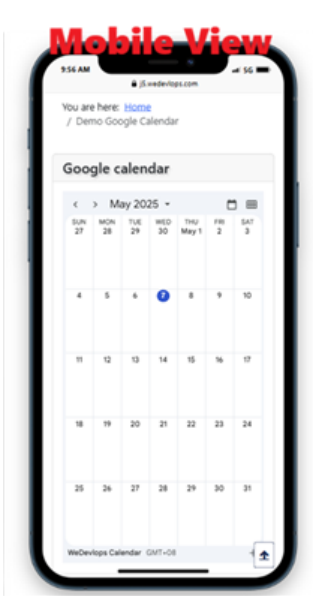

- It works with different languages, making it accessible to international users.

No Coding Required

- Simple setup via Joomla's module manager.
- No need to modify template files or write custom code.

This module is perfect for businesses, organizations, and event planners who need a hassle-free way to display their Google Calendar events on a Joomla website.
