[Key Features & Functions](#)

Easy Microsoft Outlook Calendar Integration

- Allows embedding of Microsoft Outlook Calendar using a simple URL.
- No complex configuration—just copy and paste the calendar link.

Fully Responsive Design

- Works across all devices, including desktops, tablets, and mobile phones.
- Adapts to different screen sizes for optimal viewing.

Compatibility with All Joomla Templates

- Supports Bootstrap-based templates, ensuring smooth integration.

- Works with Joomla 3.x, 4.x, and newer versions.

Multiple Calendar Views

- Displays events in month, week, and day views.
- Users can switch between views for better event visualization.

Customizable Appearance

- Allows users to modify colors and styles to match their website branding.
- Supports tooltip display for event details.

Event Details & Integration

- Shows event descriptions, locations, and times directly within Joomla.
- Integrates for location-based events.

Multi-Language Support

- It works with different languages, making it accessible to international users.

No Coding Required

- Simple setup via Joomla's module manager.
- No need to modify template files or write custom code.

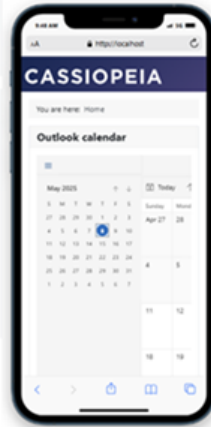

? Outlook Calendar iframe embed

? Public iCal (ICS) URL support

? ICS parsing to display upcoming events in a friendly list

This module is perfect for businesses, organizations, and event planners who need a hassle-free way to display their Microsoft Outlook Calendar events on a Joomla website.
